

ASTO.P02. Before Understanding: The Negative Guide to Attribute-Set Transition Ontology (ASTO)

First Perturber: Fuyi (ODDFounder fuyi.it@live.cn)

If you are looking for answers, please stop.

If you are looking for language, please continue.

Before you continue,
Please do not rush to understand.

Understanding is the cheapest and most dangerous action of this era.

It allows you to quickly gain a sense of order,
But also, before you realize it,
Places you into a structure prepared for you long ago.

ASTO does not provide this placement.

This Is Not a Set of Truths

ASTO does not reveal the essence of the world.
It does not discuss ultimate meaning, nor judge superiority or inferiority.

It only gazes at one thing:

**When change is inevitable,
How structures are generated,
How they fossilize,
And how they silently force restructuring.**

It is not the answer.
It is the grammatical residue left by change.

Any act of treating ASTO as a "universal principle"
Has already gone astray.

This Is Not a Stance

It does not take sides.
It does not summon "us".
It does not create enemies.

It demands no identification,
Nor needs apologetics.

When you try to use ASTO to prove yourself more awake,
Higher level,
Or closer to the truth—

Please leave immediately.

That is not understanding,
That is another form of attachment.

You Are Choosing a Way of Blindness

You think you are choosing a perspective.
Actually, you are choosing:
What you will never see.

Every perspective,
Exchanges clarity for blind spots.

ASTO does not repair blind spots.
It only forces you to realize—
You are going blind.

When you feel "everything makes sense",
That is not understanding,
That is the structure closing within you.

Norms Are Not Written Things

It is not in the law,
Not in the institutions,
Nor on the surface of the text.

It exists in:

The second you hesitated,
The sentence you deleted,
The path you knew but avoided.

ASTO does not attempt to break norms.
It only lets you touch them for the first time.

Not for resistance,
But so that before you bow next time—
You know why you are bowing.

Please Be Wary of the Tools You Will Acquire

Not only do tools domesticate hands,
Language also colonizes thinking.

Models seem neutral,
But all tools quietly make a request:

Please think in my way.

When you start to explain intimacy with stages,
Name pain with structure,
Measure sorrow with formulas—

Please stop.

At that moment,
You are no longer using the tool,
You are being used by it.

If this happens, please execute the only command:

| *Discard the theory.*

Not because it is wrong,
But because your existence is being overshadowed by it.

This Is Not a Door

You will not arrive anywhere here.

What you enter,
Is not a hall,
Not a system,
Not a finished state.

But a room that is always unfinished.

On the walls are sketches repeatedly erased,
On the ground are broken tools,
On the table is half a sentence unfinished.

What you are invited to,
Is not to learn,
But to remain unfinished.

When you have walked far enough,
Please remember this:

**If ASTO one day prevents you from changing itself—
Please leave it without hesitation.**

Do not erect a monument for the bridge.
Do not build a temple for language.

The river is still flowing.
That is the only thing worthy of respect.

Your Entry: Path Branching

Do not read from beginning to end. Choose your path according to your confusion:

Path A: Philosophical Explorer

"I want to know why I am lost, why cognition goes wrong, and what the structure of good and evil is."

- **ASTO.P03. Epistemology:** Understanding the Inevitable Defects of Cognition and Evidentiary Cognition
- **ASTO.P04. Manifesto:** Understanding the Core Dynamics of Ontology (1-5-6-7-1)
- **ASTO.P06. Values and Boundaries:** Understanding the Plurality Test, Face of the Other, and Untouchable Dimension

Path B: Engineering Practitioner

"I don't care about philosophy, I just want to know how to solve technical debt and design high-availability systems."

- **ASTO.P04. Manifesto (Chapter 8):** Engineering Toolbox Index
- **ASTO.P05. Axioms:** Thermodynamic Laws of Systems

- **ASTO.E01. Practice Guide:** Operational Guide for Life and Work
- **ASTO.E05. Engineering Handbook:** Complete Manual for Adversarial Testing and Horse Race Mechanisms

Path C: Problem-Driven

"I have specific problems, give me direct answers."

For applied/engineering topics (AI, Web3, automation, etc.), see the main index (these series are currently maintained in Chinese):

- [Main index](#)

Path D: Youth Edition (Lite)

"I want to avoid obscure jargon and look directly for 'cheat codes' to deal with life's dilemmas."

Youth edition and humanities narratives are currently maintained in Chinese. See:

- [Main index](#)

Appendix: Quick Navigation (EN)

Goal	Suggested EN document
Understand cognition limits and evidence	ASTO.EN.P03 Epistemology
Establish the core dynamics and action program	ASTO.EN.P04 Manifesto
Understand values/boundaries and ethical circuit breaker	ASTO.EN.P06 Values
Understand freedom as boundary	ASTO.EN.P07 Freedom
Exception state & crisis structures	ASTO.EN.P08 Exception
Anti-totalitarian critique	ASTO.EN.P09 Critique
Democracy as civilizational immune system	ASTO.EN.P10 Democracy
Theory self-immunity and antifragility	ASTO.EN.P11 Resilience

Goal	Suggested EN document
Glossary / terminology normalization	ASTO.EN.U02 Glossary
<i>For engineering practice, humanities narratives, youth edition, and domain extensions (currently maintained in Chinese), see: Main index</i>	
(Functional Tree: refer to P01 or README)
